Project 2 | Part 4

Student Information:

- Name: Brahian Maidana
- Section:Tue/Thur
- Email: bdmaidana@madisoncollege.edu

Planning List

Input Variables

- `costOfMeal : number : the original cost of the meal`

Output Variables

- `each tip amount for 10%, 12.5%, 15%, 17.5% 20%`
- `each total`

Process Checklist

```
1. Declare constants for the tip percentage(10, 12.5, 15,
   17.5, 20)
2. calculate each tip amount and final total
3. write the results with the three columns tip% tip
   amount and final cost
```

Your Output

```
Cost of meal: $60

Tip %    Tip            Final Cost
=============================
10%      $6.00          $66.00
12.5%    $7.50          $67.50
15%      $9.00          $69.00
17.5%    $10.50         $70.50
20%      $12.00         $72.00
```
